or go to  
**roadreadycentre.com.au**  
click the ACCELERATE 30 panel on the home page and follow the link to book.

## The Vulnerable Road User Program

The Vulnerable Road User Program is designed to give new drivers greater insight, awareness and respect for motorcyclists, cyclists and pedestrians in order to reduce risk and harm.

This course is broken into 2 parts; a pre-course workbook (1 hour) done independently followed by a short workshop (2 hours) where you discuss and consider questions with the class.

This is an approved learner licence training program under the Road Transport (Driver Licensing) Regulation 2000

## ACT Safer Driver Course

The ACT Safer Driver Course aims to improve and develop your confidence and safe driving behaviours. It teaches you to anticipate hazardous situations before transitioning onto your P's.

This course is broken into a 2.5 hours workshop and a 1 hour practical driving component.

The practical driving component of the package is conducted on public roads under the supervision of an ACT Accredited Driving Instructor in a dual control vehicle, allowing the instructor to manage the risk of the drive.

There will be up to 3 learner drivers in the vehicle, taking turns to drive for a short period, then the instructor will conduct a drive for the learners to observe.

This is an approved learner licence training program under the Road Transport (Driver Licensing) Regulation 2000
